

Global Citizens

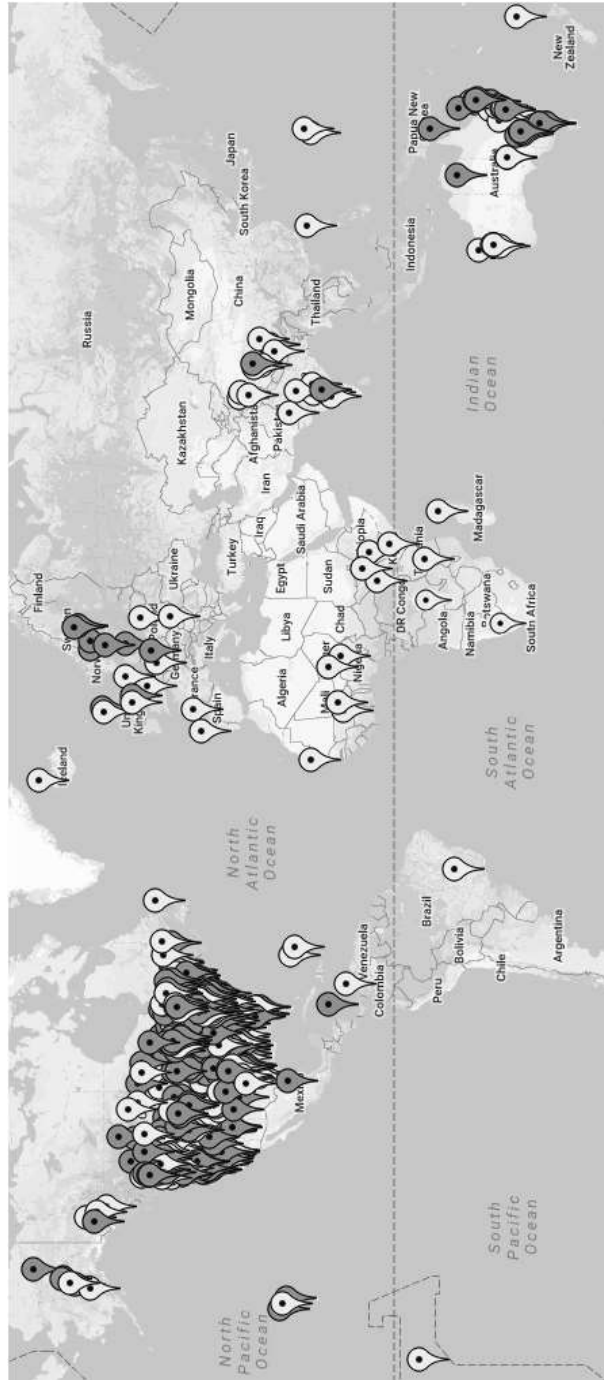

Citizens' Climate Lobby has hundreds of chapters in over 40 countries around the world with citizens like you who are building the political will for a livable world by:

- Meeting with elected representatives
- Building alliances
- Writing op-eds and letters to the editor
- Meeting with editorial boards
- Initiating letter-writing campaigns
- Offering public outreach events on climate change

“I have come to believe that if citizens come together in their communities and societies and demand change they will get change. It may not be perfect but they will get change.”

David Michael Terungwa,
CCL Africa Regional Coordinator
January 2018

Empower

Citizens' Climate Lobby Chapters February 5, 2018

The climate is changing now!

We should too.

You can make all the difference on the world.

Citizens' Climate Lobby

Our Strategy is Simple The Outcome is Huge

Empower individuals so that they experience significant growth of their own political and personal power, as well as discover and celebrate their own capacity to make a significant difference in this world. Our volunteers break down partisan and ideological barriers by reaching out to key stakeholders to build positive, effective working relationships.

“If you want to join the fight to save the planet, to save creation for your grandchildren, there is no more effective step you could take than becoming an active member of this group.”

*Dr. James E. Hansen,
Author: “Storms of Our
Grandchildren” and
former Director, NASA
Goddard Institute*

Simple

Johannesburg, South Africa – January 2018

Bogotá, Colombia – November 2017

Canberra, Australia - 2017

Carbon Fee and Dividend

Levy a federal fee on fossil fuels at the source: mine, well, or port of entry.

- Distribute all revenues back to the people in the form of a dividend cheque to offset higher energy costs and build public support.
- Include a border tariff adjustment to discourage businesses from relocating where they can emit more CO₂. This will encourage other nations to adopt equivalent carbon pricing.

Our plan will reduce demand for fossil fuels and make zero/low-carbon energy sources more affordable. This will let the market determine the best alternatives for fossil fuels and minimize the need for government energy subsidies.
